## About Brenntag

### ConnectingChemistry

**Brenntag is the global market leader in in chemical and ingredients distribution and serves all major markets with its comprehensive product and service portfolio.**

We act as a link between chemical producers and chemical users. We support our customers and suppliers with customized value-added solutions for industrial and specialty chemicals. Our commitment to excellence in every aspect of our business is in our DNA. It is our goal to be the preferred partner in the chemical industry by creating the highest added value for our partners.

Our company slogan, "ConnectingChemistry", reflects Brenntag's day-to-day business and emphasizes Brenntag's center position in the value chain. Day in, day out, global Brenntag employees connect customers and suppliers, thus forming a hub for expertise and knowledge in the many different areas of chemical and ingredients.

#### **BRENNTAG IS TRULY A "PEOPLE'S BUSINESS".**

Everything we achieve as a business is accomplished with and through our employees. They are the connection between our business partners. They connect people and build relationships.

# Brenntag Personal Care

**Brenntag Personal Care is composed of a dedicated team committed to discovering innovative solutions.**

We have built an outstanding reputation for providing superior, solution-oriented support to exceed the needs and expectations of our partners.

In our Personal Care technical application laboratories, we develop tailor-made, novel formulations and concepts to differentiate our partners' products.

The team can leverage the full breadth of our supply chain and product range to devise the perfect solution for any application such as:

Baby Care

Facial Care

Hair Care

Body Care

Oral Care

Toiletries

Colour Cosmetics

Fragrance

# Personal Care Ingredients

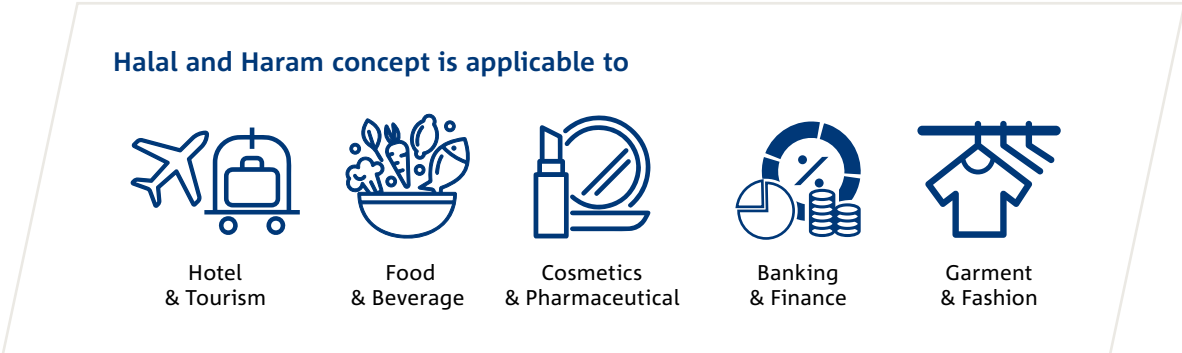

Being the top distributor of chemicals and ingredients in the world has its advantages. One of those advantages is being able to amass an enormous line of personal care ingredients to supply you with.

<p><b>Active</b></p> <ul style="list-style-type: none"> <li>■ AHA/BHA</li> <li>■ Anti-bacteria</li> <li>■ Anti-tartar/plaque</li> <li>■ Cooling Agents</li> <li>■ Deodorizing Agents</li> <li>■ Marine Extract</li> <li>■ Natural Extract</li> </ul>	<p><b>Cleansing/ Anionic Surfactants</b></p> <ul style="list-style-type: none"> <li>■ Alkyl Ether Sulfates</li> <li>■ Alkyl Phosphates</li> <li>■ Alkyl Sulfates</li> <li>■ Lactylate</li> <li>■ Methyl Ester Sulfonate</li> <li>■ Sulfonates</li> <li>■ Sulfosuccinate</li> <li>■ Sarcosinate</li> </ul>	<p><b>Rheology Modifier</b></p> <ul style="list-style-type: none"> <li>■ Acrylate Copolymer</li> <li>■ Carbomer</li> <li>■ Carboxy Methyl Cellulose (CMC)</li> <li>■ Carrageenan</li> <li>■ Gellan Gum</li> <li>■ Natural Guar</li> <li>■ Polyacrylate</li> <li>■ Succinoglycan</li> <li>■ Xanthan Gum</li> </ul>	<p><b>Humectant &amp; Moisturizer</b></p> <ul style="list-style-type: none"> <li>■ Ammonium Lactate</li> <li>■ Glycerine</li> <li>■ Natural Sugar Derivative</li> <li>■ Potassium Lactate</li> <li>■ Propanediol</li> <li>■ Sodium Lactate and Sodium Gluconate</li> </ul>

# Halal

Our extensive portfolio, technical support, and value-added services make Brenntag the leader in the Personal Care sector and allow us to provide solutions guaranteed to meet all formulation needs for instance Halal, Natural or Organic formulations.

The concept of Halal and Haram aids Muslims when making decisions about what is permissible and what is not permissible to use in their daily lives.

Halal  
حلال

Haram  
حرام

When applied to cosmetics, it means products that have been manufactured, produced and composed of ingredients permissible under Islamic Sharia law.

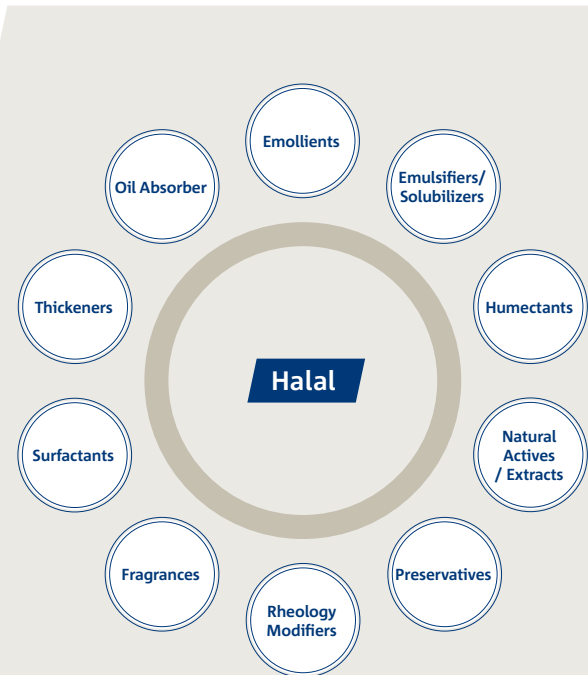

Thus, halal cosmetics are being requested more and more, and the importance of being able to supply them is increasing.

As the global market leader in chemical and ingredients distribution, Brenntag can offer a comprehensive range of ingredients that comply with Islamic requirements for any functions.

Other ingredients are deemed “haram,” meaning their consumption is forbidden.

In recent years there’s been an increasing demand for the development and sale of halal cosmetics, especially in Muslim countries.

Muslims constitute the second largest religious group in the world, and demand for halal products is increasing, driven by better consumer awareness and knowledge of the ingredients being used in cosmetics.

# Natural

Apart from Halal, another one of the main trends of the global cosmetics market is the growing interest for products with natural ingredients.

A certification logo guarantees that a product is natural or organic. That means the product must have been verified and certified by international organizations such as Ecocert Greenlife & COSMOS.

However, a product with no certification logo does not mean it is not natural or organic.

The new ISO 16128 for natural cosmetics has been introduced with the aim of harmonizing terminologies relating to organic and natural ingredients between different countries of the world.

The standard comprises guidelines on definitions and criteria for natural and organic cosmetic ingredients and provides a framework to determine the natural/organic content of ingredients in formulations.

The ISO 16128 offers advantages for the user such as:

## Customer

Easy to understand contents

## Industry

No entry cost  
Not required to pay certification fees or license fees  
Calculation can be done in-house quickly

However, the ISO 16128 is not certifiable. The information will be based on simple statements and declarations of ingredients producers. The concept of traceability of ingredients guaranteed by certification body is absent from ISO 16128.

With a wide range of product portfolio and world-class suppliers, Brenntag can also provide the ingredients that certify/comply with natural, organic ingredients or ISO 16128.

## Sustainability – EcoVadis

EcoVadis is the world's most trusted provider of business sustainability ratings, intelligence and collaborative performance improvement tools for global supply chains.

EcoVadis makes companies' activities in the field of sustainability comparable and measurable.

They evaluates companies' sustainability performance in terms of the following four categories:

- Environment
- Labour practices
- Fair business practices
- Sustainable procurement

As the global number one in chemical and ingredients and as a sustainable company, we are aiming to contribute towards greater sustainability across our industry, and to make our own sustainability performance transparent.

For several years, Brenntag has voluntarily undergone a regular sustainability assessment by EcoVadis.

We have continuously improved scoring since our first EcoVadis assessment in 2014 and achieved the Gold recognition status in 2016. With our 2020 score, Brenntag is among the top 1% of all the companies rated in the industrial sector in which Ecovadis categorizes our company and continue to maintain our Gold status.
