

Mobil Serv<sup>SM</sup> Lubricant Analysis

# Essential predictive maintenance

Energy lives here<sup>TM</sup>

# Monitoring the lifeblood of your equipment

Mobil Serv™ Lubricant Analysis provides you with critical information on the health of your operation to help you:

- Enhance equipment reliability to increase productivity
- Reduce maintenance costs and unscheduled downtime
- Improve equipment durability
- Lessen lubricant consumption

No other program can offer you our expert knowledge of Mobil™ products, as well as extensive understanding of applications and equipment through over a century of field experience and relationships with original equipment manufacturers (OEMs). The program provides you with precise analysis and detailed, actionable recommendations through an intuitive interface for easy account management and fast results accessible on your computer or mobile device.

## Crucial analysis, convenient access

Designed to monitor key performance indicators based on international standards and on the specifications of leading equipment builders, Mobil Serv Lubricant Analysis provides you with:

## Flexibility

- To choose the specific analysis that fits your needs
- To use time-saving scan-and-go technology for sample registration
- To receive and view sample results anywhere

## Expertise

- To use proprietary test control limits set specifically for your equipment
- To help you set up and operate an optimal analysis program through robust field support
- To identify problems, establish causes, and recommend actions

## Quality assurance

- Through best-in-class, regularly audited practices and methods
- Through commitment to consistent, accurate analysis

Protect the health of your operation with precise analysis and informed recommendations backed by more than 130 years of lubricant development and more than 40 years of providing oil analysis to our customers. Mobil Serv Lubricant Analysis offers you convenience, expert guidance, and peace of mind.

Backed by the full support and technical expertise of the ExxonMobil team of formulators, scientists, and engineers, **Mobil Serv Lubricant Analysis** is designed to help you avoid costly equipment issues and achieve peak productivity.

For more information about Mobil Serv<sup>SM</sup> Lubricant Analysis and other Mobil<sup>TM</sup> lubricants and services, call your local company representative or the ExxonMobil Technical Help Desk at 800-662-4525.
