Essen, November 8, 2022

Brenntag chooses Amazon Web Services as its preferred cloud provider enabling Brenntag's digital and data ambitions

Brenntag, the global market leader in chemicals and ingredients distribution, today announced a multi-year project with Amazon Web Services (AWS), an Amazon.com company (NASDAQ: AMZN). AWS will enable Brenntag to accelerate the integration of digital processes and services and unlock the value from its data. In a fast paced and complex world, customers and supply partners want simple yet personalized interactions to work efficiently and pivot quickly when needed. Brenntag's global supply chain network provides proprietary data and insights that enable the company to deliver more value to its customers and supply partners. With AWS, Brenntag can provide systems and data processing across a variety of systems while also ramping up internal capabilities to facilitate an agile modular deployment of systems, automation solutions and services.

"We are excited to work with AWS," said Ewout van Jarwaarde, Chief Transformation Officer at Brenntag. "At Brenntag we put our customers and supply partners at the heart of what we do every day to ensure we are the easiest to do business with. Ensuring seamless interconnection of data and data-as-a-service for our customers and supply partners across the globe, and across a variety of platforms and systems in a fast and secure way, will allow us to ultimately serve our partners more efficiently. AWS is supporting our transformation through trainings, services and provides a holistic integration of data streams."

The support and training provided by AWS during specially dedicated cloud immersion days will provide consistency for scalability and the broad integration of interconnected platforms globally. This will make internal and external data connections faster, smoother, and more secure.

This training will take place across several Brenntag locations to Brenntag employees and will support the company' digital transformation by providing best-in-class cloud infrastructure to enable a hub-and-spoke system of data connectivity.

Over the coming years, Brenntag will utilize AWS infrastructure and support to implement a variety of best practice solutions, such as a multi-modal track and trace program for customer and supply partner orders.

About Brenntag:

Brenntag is the global market leader in chemicals and ingredients distribution. The company holds a central role in connecting customers and suppliers of the chemical industry. Headquartered in Essen, Germany, Brenntag has more than 17,000 employees worldwide and operates a network of about 700 sites in 78 countries. In 2021, Brenntag generated sales of around 14.4 billion EUR. The two global divisions, Brenntag Essentials and Brenntag Specialties, provide a full-line portfolio of industrial and specialty chemicals and ingredients as well as tailor-made application, marketing and supply chain solutions, technical and formulation support, comprehensive regulatory know-how, and digital solutions for a wide range of industries. In the field of sustainability, Brenntag pursues specific goals and is committed to sustainable solutions in its own sector and the industries served. Brenntag shares have been listed at the Frankfurt Stock Exchange since 2010, initially in the MDAX and since September 2021 in the DAX. In addition, the Brenntag SE shares are listed in the DAX 50 ESG and DAX ESG Target. For more information, visit www.brenntag.com.
