Brenntag Food & Nutrition extends distribution agreement with Marigot for Sweden

Brenntag Food & Nutrition has extended the agreement with Marigot for the exclusive distribution of Marigot's range of plant and marine based minerals in Sweden as of June 2022. The new geographic territory is an expansion of the existing cooperation in Denmark. Marigot's Aquamin range has built a strong reputation as a clean, natural, and bioactive source of marine multi minerals.

"We are very proud to represent Marigot's Aquamin range in Sweden and Denmark. Thanks to our close contact to the food and dietary supplement industry we will be able to create value for our customers with this natural source of Calcium, Magnesium and trace marine elements", comments Lone Andersen, Nordic Business Development Manager Brenntag Food & Nutrition Nordic. "The valued reputation and track record of growth of Brenntag Food & Nutrition in these markets and a strong position in Denmark contributed to Marigot's decision to expand our exclusive partnership in Sweden."

"There is increasing demand for natural clean label, sustainable and scientifically supported ingredients that bring added health benefits to products", states Paul Donegan, Commercial Development & Marketing Manager Marigot Ltd. "We anticipate growing demand for our high-quality ingredients, especially in fortified food and beverages, dietary supplements and lifestyle nutrition. Our extensive scientific research supporting Aquamin continues to expand, and we are confident in seeing further success in our target categories. Marigot's expanded partnership with Brenntag Food & Nutrition in the Nordic region is an important part of our overall growth strategy."

About Aquamin & Marigot

Aquamin is a unique marine multi-mineral complex that provides bioactive calcium, magnesium and 72 other trace marine minerals, for the fortification of food, beverage and supplement products. Unlike other mineral sources used in food, beverage and supplement preparation, Aquamin is derived solely from seaweed harvested under an exclusive license off the coast of Iceland. The seaweed, which

absorbs trace minerals from the surrounding seawater, coupled with Aquamin's unique structure, results in a mineral rich product that is neutral tasting, free of chalky texture and easily absorbed by the human body. Aquamin Magnesium extracted from seawater, is a highly bioavailable source of magnesium for use in food, nutraceuticals and dietary supplements. Marigot Ltd. was established in 1993 and operates under a system that fosters an entrepreneurial approach, the core business involves the identification and development of naturally derived ingredients for the enhancement of Human, Animal and Plant Health.
