

Gender Pay Gap Report 2024

Presenting our Gender Pay Gap Report for the current year, we acknowledge a 28.19% gap between the earnings of men and women within our organization.

It's essential to note that our workforce, much like our industry as a whole, is predominantly male, with 72% of our employees being men, leaving women filling the remaining 28%.

Our Gender Pay Gap is notably influenced by the structure of our Operations teams, where 99% of Yard Operators and Drivers are male, accounting for approximately 38% of our total workforce. Despite the challenges in attracting female candidates to these roles, we've made progress in recruiting female drivers and operators this year.

In addition to our recruitment efforts, we recognise the significance of family-friendly policies in fostering equality. To this end, we are committed to providing enhanced maternity, adoption and paternity leave payments. By providing competitive and equitable support for employees during parental leave, we aim to support individuals in taking time off to care for their families without facing financial strain.

Through these initiatives, we continue to work on cultivating an environment where everyone feels valued and supported. We remain dedicated to promoting diversity and inclusion across all levels and departments, driving positive change within our organization and the wider community.

Furthermore, we are actively encouraging more female applicants to our Operations roles. While 27% of our job offers in 2024 were extended to female applicants in other areas of the business, we are committed to increasing female representation across all functions. Additionally, we operate a successful woman into leadership programme and have set a target to have 20% female representation within our senior leadership team by the end of 2030.

Brenntag UK Ltd continues to be an equal opportunities employer, not discriminating based on gender or any other protected characteristic. We believe in appointing the best candidate for the role based on merit. We welcome applications from any gender for any role and are confident that female and male colleagues are paid equally for equivalent jobs throughout our business. Our salary benchmarking ensures fairness, paying based on the margin/banding for each specific job role, rather than gender. Similar roles are compensated equally throughout the business, irrespective of gender.
